■ About Company

At Torque Traders, we specialize in delivering a wide range of high-quality electrical protection devices and safety & security systems, tailored to meet the needs of residential, commercial, and industrial clients.

From circuit breakers to fire suppression and CCTV – we offer trusted solutions that ensure your premises remain safe, secure and compliant.

■ Introduction

Torque Traders delivers high-quality electrical protection and safety solutions designed for reliability across residential, commercial, and industrial sectors.

We are committed to providing trusted products and services that ensure long-term safety, efficiency, and performance.

■ Our Vision And Mission

To be a leading provider of innovative, dependable electrical and safety solutions that safeguard people and infrastructure.

■ Our Product & Solution Portfolio

Electrical Protection Devices
Safety & Security Systems

■ Electrical Protection Devices

01

Miniature Circuit Breakers (MCBs):

Reliable overload and short-circuit protection for residential and commercial wiring.

02

Moulded Case Circuit Breakers (MCCBs):

Heavy-duty protection for high-current industrial & commercial installations.

03

Residual Current Circuit Breakers (RCCBs):

Essential protection against earth-faults and electrical leakage, preventing shock & fire hazards.

04

Distribution boxes:

Neat, organized distribution panels for safe and efficient power distribution.

05

Surge Protection Devices (SPDs):

Shield your equipment from voltage spikes and surges.

06

Voltage stabilizers:

Maintain stable voltage supply to protect sensitive equipment from fluctuations.

07

Uninterruptible Power Supply (UPS):

Reliable backup power solutions to ensure continuity during outages.

08

Switches, Plug & Sockets :

High-quality, safe wiring accessories for homes, offices and industrial setups.

09

Lightning Protection Solutions:

Systems that protect structures and electrical installations from lightning strikes and surge damage.

10

Arc Fault Detection Devices (AFDD):

Intelligent safety units that detect dangerous electrical sparking and hidden wiring faults to prevent electrical fires

■ Safety & Security Systems

01

Fire Suppression Systems:

Systems engineered to automatically detect and suppress fires, reducing damage and ensuring safety.

02

CCTV Surveillance Systems :

Surveillance solutions that provide continuous monitoring and recording for enhanced security.

03

Fire Alarm Systems :

Early detection systems that alert occupants instantly in case of fire emergencies.

04

Public Address (PA) Systems:

Audio systems used for clear announcements, emergency communication, and public messaging.

■ Why Choose Torque Traders?

- **Comprehensive “One-Stop” Solutions** — From basic wiring devices to full-fledged fire and security systems, you find everything under one roof.
- **Quality & Safety First** — All products comply with industry standards, ensuring reliable protection against overloads, leakage, short circuits and electrical hazards.
- **Customized Solutions** — We understand that every building or project has unique requirements. Our team works with you to design systems tailored to your needs.
- **Expertise Across Sectors** — Whether it’s a residential complex, a corporate office, a factory or a public building — we deliver solutions that meet diverse requirements.
- **After-Sales Support & Service** — We don’t just supply equipment; we support installation, maintenance and periodic inspection to ensure long-term safety and performance.

Thank You!

At Torque Traders, we commit to delivering safety, reliability and peace of mind.
